Buglo

6503

Available colours

RAL 7044 | RAL 8025 | RAL 5024 | RAL 6011 | RAL 7047 | RAL 1002 | RAL 2012 | RAL 6027

Information about the product

Dimensions	170 x 196 cm
Overall height	42 cm
Availability of spare parts	Yes

Technology

ROTO
FORM MASTER PLUS

A technology that enables **HDPE polyethylene** to be formed into designer furniture from the **Outi collection**. As a result, each piece is both durable and unique.

Warranty

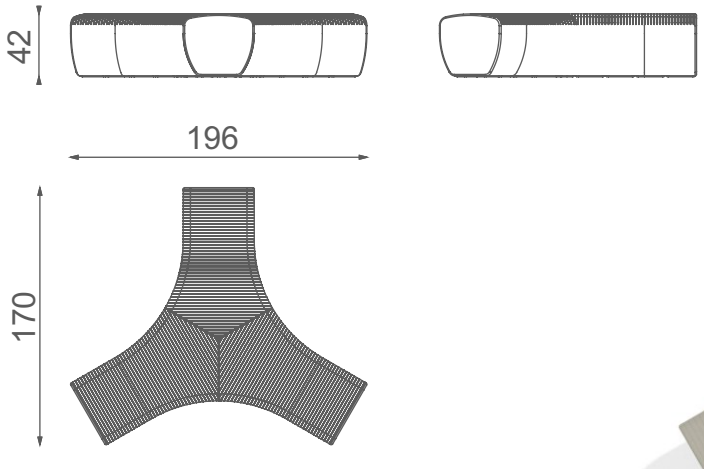

Lifetime
The warranty covers the durability of components made of HDPE (high-density polyethylene), as well as the structural integrity of components made of black steel that has been powder galvanised and powder coated, stainless steel, and components made of hot-dip galvanised steel.

10 years
The Guaranty covers all flaws of the elements made of HPL, HDPE, stainless steel, hot-dip galvanized steel, wooden elements (pine, spruce), revealed during usage, which arise from manufacturing reasons.

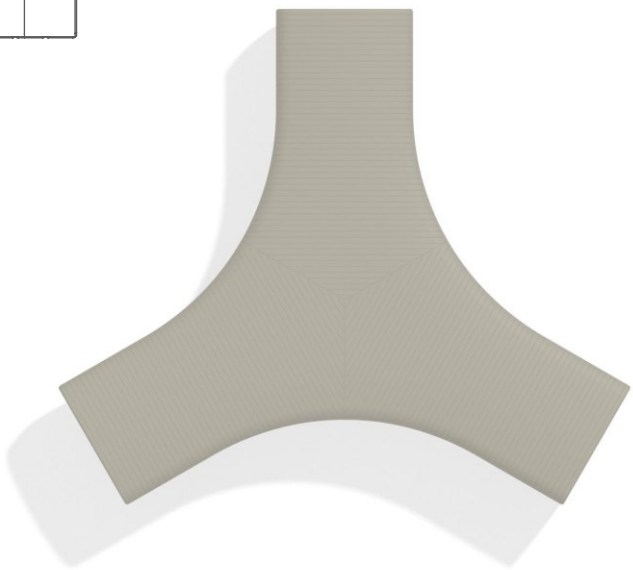

5 years
The Guaranty covers all flaws of the elements made of powder coated steel, aluminum, laminate, ropes, elements made in rotomoulding technology, elements made of polyamid, polypropylene elements, revealed during usage, which arise from manufacturing reasons.

2 years
The Guaranty covers all flaws of the elements made of rubber, moving elements (bearings, joints), electronic elements, elements made of EPDM, elements made of plywood and other not mentioned before revealed during usage, which arise from manufacturing reasons.

Product description

6503 Branching Bench

Dimensions:
- Product dimensions: 170 x 196 cm
- Overall height: 42 cm

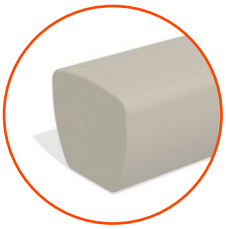

The Branching Bench is an element with a multidirectional form, enabling the creation of complex, expanding seating layouts. It acts as a compositional node that integrates different arrangement directions and enhances spatial functionality.
It is part of a series of modular furniture designed for public spaces, characterised by high durability and configurational flexibility. The forms are based on smooth lines and rounded geometric transitions, enabling the creation of cohesive arrangements with varied functions and scales.
The collection is manufactured using rotomoulding technology with HDPE (high-density polyethylene) granulate, ensuring a uniform material structure, high mechanical resistance, and durability under intensive use. At the same time, it provides resistance to UV radiation, moisture, temperature fluctuations, and mechanical damage, making the elements suitable for both indoor and outdoor environments.

Installation method

on flanges

Materials

Rotomoulding technology with HDPE (high-density polyethylene) granulate, ensuring a uniform material structure, high mechanical resistance, and durability under intensive use. At the same time, it provides resistance to UV radiation, moisture, temperature fluctuations, and mechanical damage.
