MATERIAL SPECIFICATION

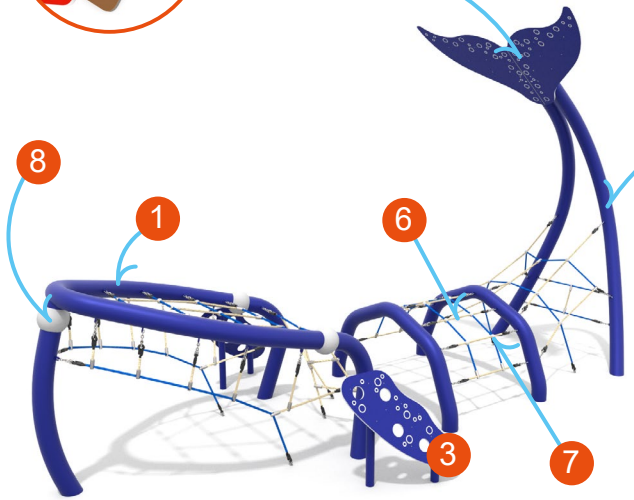

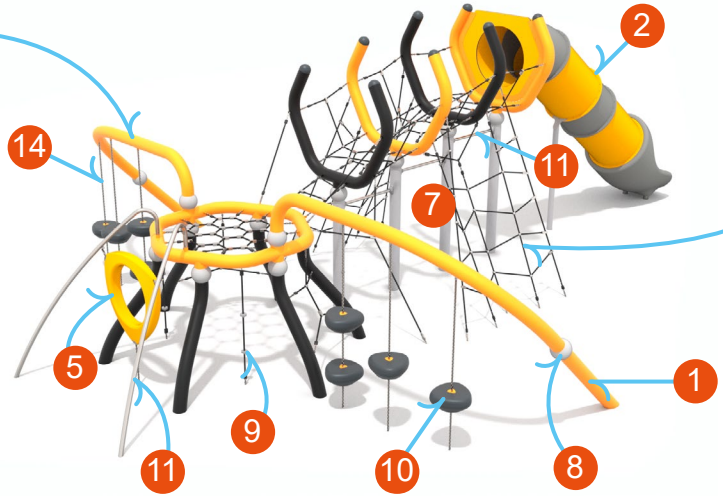

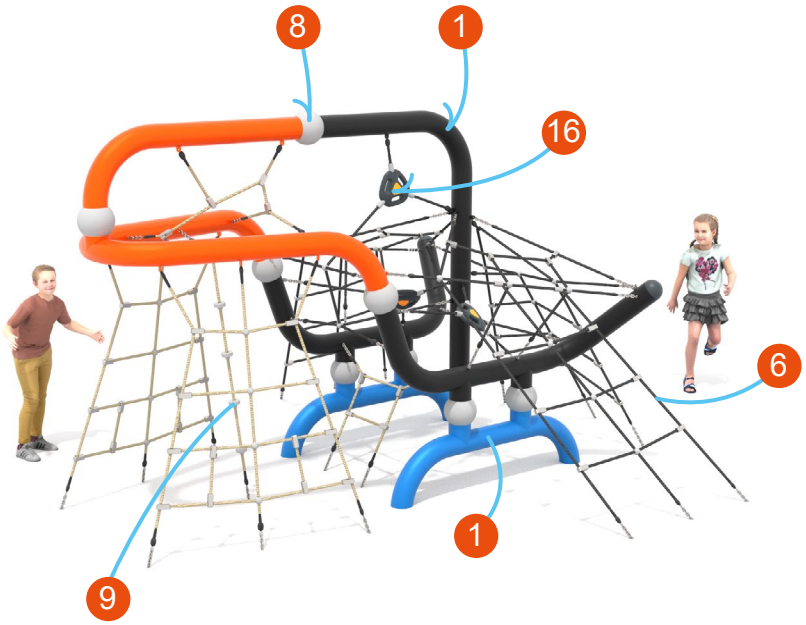

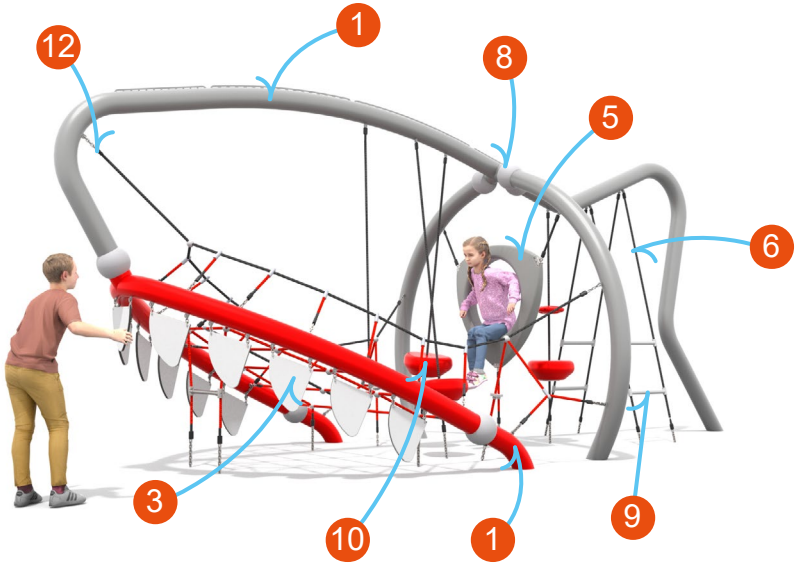

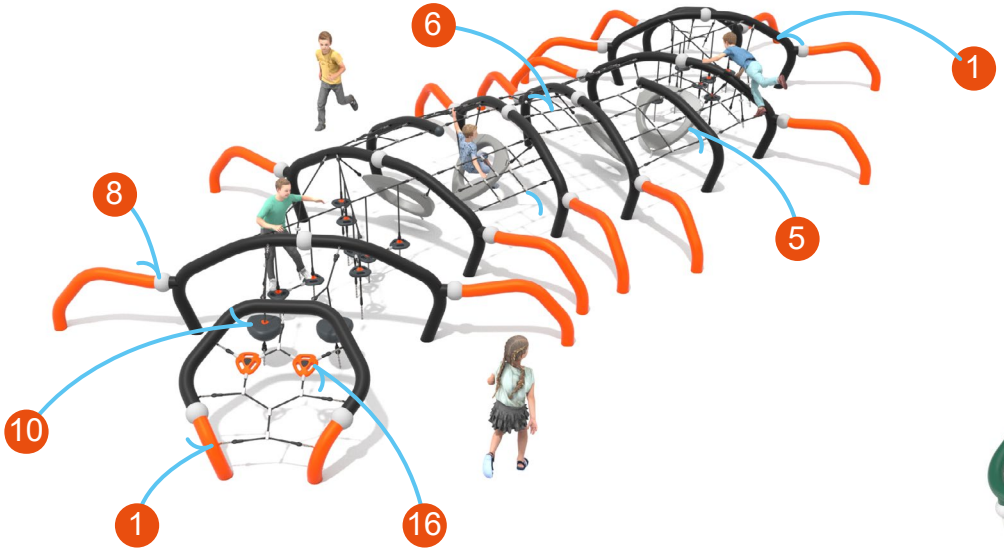

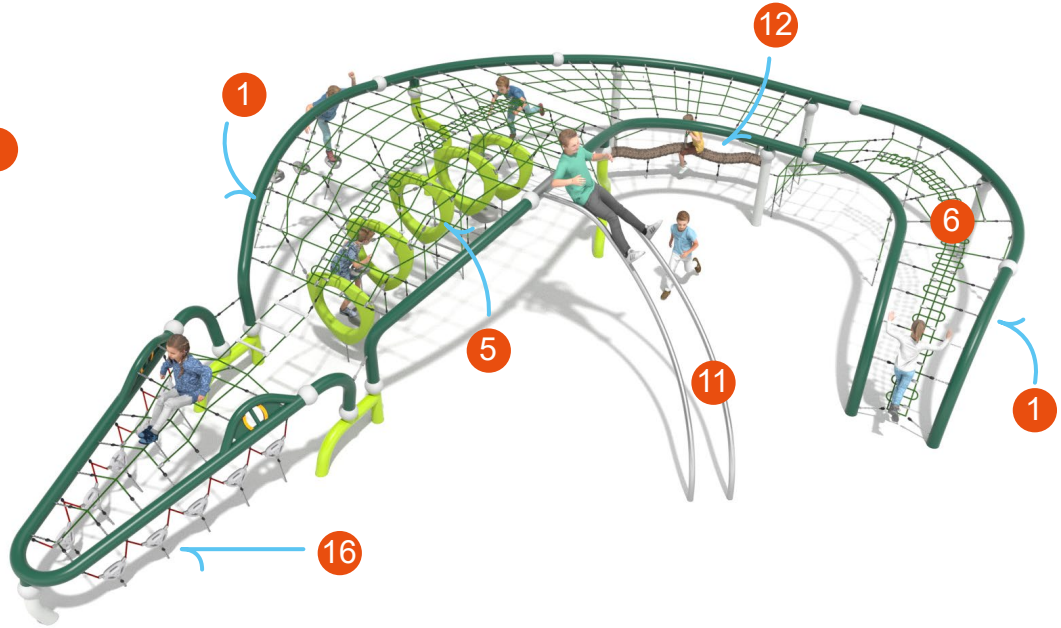

Buglo

1

Solid construction made of black steel S235JR,cleaned in the shot blasting process. All elements made of black steel are subjected to a two-layer powder coating process, which includes the following stages: First layer– zinc-rich primer, Second layer – topcoat in RAL colour

2

Open, modular, polyethylene slides made using the roto-moulding method from LDPE material

3

Plates of the walls made of colourful triple layered 15 mm HDPE polyethylene, in the highest quality, totally damp--proof and resistant to UV.

4

Climbing stones made of a mixture of aggregates and coloured polyester resins.

5

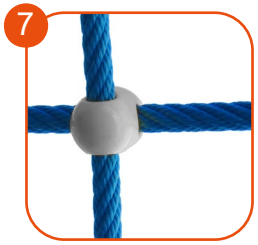

Ergonomically-shaped polyethylene rings improving the physical well-being and motor coordination.

6

Polypropylene ropes PP-Multisplit type with a steel core and a diameter of 16 mm.

7

Solid and esthetic rope connectors made of injection molded polyamide.

8

Pipe joint cover made of polyamide, rotationally moulded.

9

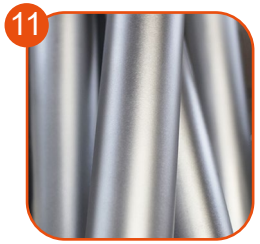

Rope ladder steps and rope knots made of injection molded polyamide.

10

Modules made of rotationally moulded polyethylene, designed to develop physical fitness and motor coordination.

11

A solid structure made of AISI 304 stainless steel, cleaned using the glass bead blasting process, fully resistant to weather conditions.

12

Braided rope with a diameter of Ø 140 mm, suspended on ropes with a diameter of Ø 16 mm. 16 mm ropes with steel core type pp-multisplit

13

Element made using the rotomoulding method from LDPE material. Each sphere is made of 12 such elements.

14

Natural posts made of robinia acacia wood, protected against splitting.

15

Plates of the walls and platforms made of colourful 13 mm HPL (black plates made of 8 mm HPL), in the highest quality, totally damp-proof and resistant to UV.

16

Handle made of rotomoulded LDPE type material.

17

The seats are made with an aluminum construction covered with a soft EPDM rubber, hanged on 6mm stainless steel chains.
